VOL 9 NO. 19 | Lancaster Farming, Saturday, April 11, 1964 | $2 Per Year

NEW MARKET NEWS REPORTER, Jim Anderson, began duties this week at the Lancaster Union Stockyards. He comes to the Lancaster office of the USDA Market News Service from the East St Louis office He replaces Jim O'Hara who was in charge of the office for the past 5½ years L F Photo

Governor Approves Plans For State Dairy Show

HARRISBURG — State Secretary of Agriculture Leland H Bull today announced the formation of the Pennsylvania All-American Dairy Show, a new state-sponsored international event that will make its bow Sept. 14-17 in the State Farm Show Building in Harrisburg

Open to breeders of registered dairy stock in the United States and Canada, it will embrace the six principal dairy breeds — Ayrshire, Brown Swiss, Guernsey, Holstein, Jersey and Milking Shorthorn

Preparations for the show, Secretary Bull stated, have been underway for some time in anticipation of official authorization by the commonwealth This has been given by unanimous action in both houses of the State Legislature

Market News Reporter Begins Duties At Yards

James L Anderson this week began work as U S D A Market News Service reporter at the Lancaster Union Stockyard

The 32 year old former farm boy from Carbondale, Ill, graduated in the general agriculture course at Southern Illinois University in 1954 and immediately went into the U S Air Force where he served for three years

Upon release from the service he worked for three years at the Illinois Fruit Growers Exchange and other positions in agri-businesses in Illinois For three years he was with the Federal-State Market News Reporting Service where he reported the Peoria market for the state of Illinois.

For the past year Jim has reported the National Stock Yards at East St. Louis, Mo, for the U S D A. Market News.

Anderson will replace Jim O'Hara, who was in charge of the Lancaster office for the past 5½ years O'Hara has been transferred to the U.S.D.A. Market News office at Kansas City, Mo

Anderson will report market prices and conditions at the Lancaster Stock Yards (both private treaty sales and the weekly auction), the Tuesday Vintage auction and the Thursday New Holland Auction.

He is married to the former Verna Lacy, also of Carbondale The couple has one daughter, Gloria Ann, 2½ years old They have rented a home on Wabank Road, Lancaster.

Secretary Of Agriculture Calls For Quality Program

Secretary of Agriculture, Leland Bull, this week called for more quality control programs for farm products to meet competition with foreign imports.

"Rather than complaining about the 10 per cent beef coming into the country, we must make our products more attractive in order to compete," he told members and farmer guests at a meeting of Lancaster Rotary Club Wednesday in the Hotel Brunswick.

He backed up his statements by relating his experiences in Europe last fall. He said, "Europeans told me, 'We are getting our health programs in line with yours. Now what are you going to use for an excuse to keep our food out?", and we are going to have to do something about it."

Bull said last year nearly 33 million dozen eggs were packed under the Pennsylvania Certification program. The program has met with such success, he said, that now Christmas tree growers, mushroom growers and fruit growers all want similar certification for their products.

He said Pennsylvania must embark on a program of research, advertising, and packaging to sell the housewives in Europe some of our farm products as they have been selling theirs here.

He called for study to try to reduce some of the "distance" between the farmer and consumer. There is less than one cent worth of corn in a 25 cent package of corn flakes, he said. "How much more can come off the farmer? Not much — it must come off some other things. How can we reduce this distance between farmer and consumer?"

He called the reduced rail-

County Hog Tops Carcass Classes At York

A Lancaster County hog grabbed off the grand championship banner in the carcass classes at the York County Market Hog Show this week

The 210 pound Yorkshire, bred and shown by Willow Glen Farm, Strasburg R1, dressed out 167 pounds, had a 1.43 inch covering of backfat, 4 75 square inches of loin eye, 38 1 per cent ham and loin, and measured a whopping 33 75 inches in length to top the 35 head class.

Carcass hogs were evaluated Sunday on foot and judged Tuesday on the rail. Sponsors of the show in the Thomasville Livestock Auction pavilion was the York County Swine Producers Association.

Willow Glen Farm also had the champion trio of Yorkshires

Grassland Future Farmers Chapter Makes Sweep Of Area Contest

Grassland Chapter Future Farmers of America scored a clean sweep in the York-Lancaster area FFA public Speaking and Parliamentary Procedure contest Monday night

Glenn Weber, Mohnton R2, repeated his placing in the county contest a week earlier as he beat out all competition in the public speaking contest with a talk called, "Disaster Looms Ahead"

The Grassland Parliamentary Procedure team again beat out runner up Solanco, last year's state champions, for a shot at the regional competition April 21 at the Millersville State College Winner in the regional contest will compete in the state finals next June at The Pennsylvania State University

Third place team was from Dover, and fourth place went to Red Lion, both of York County.

In public speaking, the third place winner in county competition, Carl Fahnestock, Manheim R4, moved into the runner up spot in the area

Weber is the 15 year old son of Mr and Mrs. Andrew Weber, and is a 10th grade student

Providence 4-H Greets Members

New members were welcomed into the Providence Community 4-H club at a meeting Tuesday night at the Providence Elementary School

Members set dues at 50c per year and scheduled the meeting date for the last Tuesday of each month.

Larry Landis gave a report on tobacco growing, and members reported on their chosen projects Next meeting of the club will be April 28 at 7 30 p m in the Providence Elementary School

Angus Sale Apr. 18 At Abbottstown

The Pennsylvania Angus Association announces the first 1964 Grasstime Angus sale to be held at 1 p.m, Saturday, April 18 on the Adams County Fairgrounds at Abbottstown.

Four bulls and 64 heifers and cows, many with calves at foot will be sold. All come from prominent Angus herds in eastern and central Pennsylvania, among them Eisenhower Farms Gettysburg.

In addition to some six million home loans for veterans, the Veterans Administration has guaranteed or insured 72,000 farm loans and more than 238,000 business loans.

● Delmarva Prices Gain; Demand Good

Live broiler prices in Delmarva advanced slightly during the 24 hour period ending 10 30 Friday morning.

At farm prices ranged 14 6 to 15 8 on reported purchases of 1,124,000 head including 540,100 head listed and sold at the Eastern Shore Poultry Growers Exchange Thursday More than a third of the sales were at 15 to 15 4

Live broiler demand was good fo rthe moderate auction offerings. Ready to cook demand was spotty ranging barely fair to good on retail activity for next week.

With several plants operating today, estimated slaughter for the week end by Eastern Shore processors was 921,000 head compared to the 890,000 head last week end.

Pasture Cows Slowly

Don't hurry to let your cows out on lush pastures is the advice of Joe Taylor, extension dairy specialist at The Pennsylvania State Univ He warns that a sudden change from winter feeding to pasture feeding can cause mastitis, and suggests feeding some hay and grain before dairy cows go out to pasture each day early in the season

From Where We Stand . . .

A New Crop - Vacationers

How would you like to spend your vacation rising at the crack of dawn, doing chores around the barn and spend the day making hay or hoeing tobacco?

This probably doesn't sound like much of a vacation to most of the readers of Lancaster Farming, but to office-bound desk jockeys it might sound too good to be true, and it might just be what the psychiatrist ordered.

There is an old story about the farm boy who moved to town and got a job, worked like crazy so he could make enough money to buy a farm and retire in the country.

This is not as far fetched as it first appears. Many city residents have roots in farming, or have parents who were farmers. Even though they no longer have direct contact with farming, they have fond memories of rural living, or they have heard glowing reports of "the good old days" when dad was a boy on the farm.

Many people who have never had any direct contact with a farm just need a place of peace and quiet where they can relax and unwind, away from the pressures of the hurley-burley business day.

Farmers across the country are capitalizing on this need of the urbanite. Farm vacations have become a nice source of supplemental income in many areas Many farmers are adding $1,000 or more to their bank account from one season of "guesting" city folks.

One of our friends in North Carolina told us last year, "We figure one Yankee tourist is worth about as much as an acre of cotton, and a whole lot easier to pick."

But if you are thinking of going after some of this business, be prepared to do more than sit back with a long handled rake and rake in the money

Each double bedroom in a farm house can produce $1,000 income a season, but don't expect that much the first year In fact, you might not realize that much for many years, if ever

But an empty room is not the only requirement for successful "guesting" on a farm There are several questions you should ask yourself and the other members of the family — because this has to be a family enterprize to be successful Do you enjoy having company? Is the wife considered a good housekeeper? Is she a good cook and does she enjoy doing a lot of it? Is yours an industrious family, with projects for home improvements going on continually? Are your guest rooms comfortably furnished? Do you go on a painting spree now and then to make them more colorful and attractive? Do they have good closet space? Are they well ventilated? Are the beds comfortable? Have you adequate bathroom facilities for expanding the size of your "family"?

Is your kitchen spotlessly clean and well equipped? Have you a flower and a vegetable garden? Are you in a pleasant area of the country? Are there some recreation facilities nearby, such as a place to swim, fish, go boating, or ride horseback?

If your answers to all these questions are yes, then you meet the basic requirements, and could possibly be on the road to a successful venture in raising a new farm "crop".

But the extra income may not be the most important reason for opening your home to guests. Many farm families report that their guests were so varied that the farm children received a liberal education during the summer vacation. Farmers report that talking with other people sometimes makes them appreciate their own position more.

Conversely, farm vacations can be an excellent time for the farmer to educate the consumer about the value of food, and the problems of producing it Think of the opportunity for building good will between the consumer and the farmer Think of the impact one executive might create when he goes back to the city and reports to his colleagues that farmers are not the hayseeds they all thought.

Consider how much influence a city housewife could have if she told her neighbors how much effort it takes to produce the eggs or milk they had always taken for granted — and perhaps complained about the price.

Hosting guests is certainly not for every farm family. It may not be for very many farm families in Lancaster County, but it may well be an added cash crop for some. Tourists are arriving in the county in larger and larger droves. They have to stay somewhere. Hotel and motel accomodations are generally fine, but all too often they do not offer the change of scene the city dweller wants and so desperately needs.

That extra room might be worth as much as an acre of tobacco and think how much less time it would take in the stripping room next winter

At least that's how it looks from where we stand.

Off Beat Ice Cream

Among off beat products advertised for sale around the country recently were dill pickle flavored ice cream, introduced in California, and cocktail flavors such as Daiquiri, Irish Coffee, Grasshopper and Pink Squirrel, on sale in Chicago, and Booster, a rocket shaped water ice on a stick, a British product.

★ ★ ★ ★

Why Shopping Takes Time

Ever wonder why it takes so long to get through a supermarket? USDA says the most purchased "power" items can be placed so you travel the entire store to pick them up For example 35 percent of all shoppers buy paper products; 30 percent cookies and crackers, 27 percent soap, 25 percent coffee.

Repair Damaged Trees

Strong winds with heavy ice on tree branches sometimes causes breaks and splitting Trees having soft, brittle wood, such as soft maples, willows, and poplars may be hurt Craig S Oliver, extension horticulturist at The Pennsylvania State University, suggests that broken branches be cut off and damaged aeias be treated Wounds and cuts should be covered with "wound paint" to reduce decay For more detailed information, see your county agent.

Why Am I Here?

Lesson for April 12, 1964

Background Scripture: Genesis 1:26-30; Psalm 8; Luke 12:4-7.
Devotional Reading: Psalm 1.

IF THIS is God's world, then it is my world too. Not mine in the sense that I can do what I please with it. Only God is free to do as He likes with the world, for He and He only has the power, the wisdom and the goodness to will and to do what is absolutely right. This is God's world first because God made it. It is my world first not because I made it, but because the same God who made it made me. If I can speak of my mountains, my country — much greater than I but still truly mine, I can speak of my world, the home God made for me. I belong here. I am created just as all things are created,— not all at once with a big bang, but through the long centuries to the hour of my birth and beyond, I have come to be,—and this is the good pleasure of God.

Dr. Foreman

"Little less than God"

The poet who wrote Psalm 8 speaks of man as created little less than God. Perhaps that seems too bold; our older English translation says "little lower than the angels," but the Hebrew means plainly "little less than God." This is a staggering thought. Let us take it at its lowest meaning, so as not to be puffed up with pride. In the beginning of the Bible it is said that man is created in the image of God. That means that there is something in man, creature though he is, which shows a likeness to the God who made him

"All things under his feet"

This joyful Psalm 8 thinks of man not in seclusion with a fence between him and the other creatures around him, but as having "dominion," that is, control and mastery over the rest of creation. Now this can be done in two very different ways. A man who owns many hundred square miles of forest can cut the forest down and by careless, greedy methods lay waste the entire countryside—it has often been done. That man has demonstrated his "dominion" —his machines have been victorious over every tree that stood in their way. But the end is a vast countryside destroyed. An opposite example is another man who is a woodcarver. Out of pieces of wood, not specially beautiful, he makes objects which are useful and a delight to the eye. He is master of the wood; but when he gets through with it, he has brought beauty and usefulness into the world, not an empty desert. In times gone by witch doctors would use poisons from plants they knew of to bring death to their enemies. Today some of those very plants and their poisons are used by chemists to make medicines that save people's lives. Witch doctor and scientist both have dominion over the plants of the field,—but what a difference!

We are obliged

High though we are in the scale of life, nevertheless we are obliged to "our neighbor the universe" in ways past counting. Every atom in our bodies was drawn from the ground on which we walk, the air we breathe and the water we drink. If the universe had not nourished us we could never have been born. All the clothes we wear, everything we use and enjoy, is a gift of the universe around us. If we have friends, they too were cradled by the selfsame earth and sea and sky. When our Lord was here, it could have been arranged that he be fed by manna from the sky. But no, one of the marks of Jesus as a true and not make-believe man was that He too had to be nourished and furnished by the world around him, even as we. So, although we are indeed to have dominion over other creatures, the thought of what we owe to our wonderful world will keep us from being tyrants, hateful and destructive. If we have any power, it is God-given; and we have no right to use our powers in ways that defy the laws and slander the character of our Creator.

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Kill Weeds In Small Grain

Weeds such as wild garlic, wild mustard, wild radish, and Canada Thistle can be costly to small grain growers The spraying of the field when the grain is 6 to 12 inches high with 2,4-D will reduce or eliminate many of these weeds. If the grain is sowed down to clover or alfalfa, then smaller amounts of the spray chemical should be used. Spring oats may also be sprayed for weed control.

To Cull Cow Herd

Early spring is a good time to check the production of each cow in the herd Milk supplies are usually very high in the spring and these border-line cows, that may not be making any profit, are merely adding to the surplus amounts of milk Producers on a herd testing program need to check their records to determine the low producers. A general rule to follow is that unless the value of the milk produced is at least twice the cost of feed and hay consumed, a dairy cow is not making any profit.

To Work For Quality Forage

All livestock producers should make every effort not only to produce sufficient quantities of hay and silage, but also, to have the right kind of quality In hay-making both leafiness and color are important, but more important is stage of maturity when harvested The same is true when making grass or corn silage Growers are urged to become acquainted with the proper stage of maturity for their crop and then harvest at that time. Several days delay may drop the quality.

To Evaluate Sudan Sorghum Hybrids

Growers who will be needing additional summer pasture or material for green-chopping should consider several acres of a sudan-sorghum hybrid forage. This crop is the result of crossing sudangrass and sorghum and gives a very fast growing, palatible summer forage crop It may be grazed or green-chopped for best results, it is a bit too coarse for hay and silage. Should be seeded late May or early part of June.

Field Fresh Cabbage

Cabbage is grown in 34 of the 50 states, but Arizona and California growers send this field-fresh vegetable to market from November through April.

Harold Neigh, Penn State extension consumer economics specialist, says when buying cabbage, look for a firm crisp head, heavy or fairly heavy for its size. Soft or puffy heads usually are lower in quality.

Ag Secretary Calls For Safe Farming

HARRISBURG — Safety instruction, along with job training, was advocated today by State Agriculture Secretary Leland H Bull for the million youths who will join this year's farm work force in Pennsylvania and the other states

"If the summer's farm work is to be a pleasant and profitable experience, and not an unfortunate one, it must be free from accident," he declared.

The state's agriculture head said latest estimates indicate that this year's farm work force in the commonwealth and throughout the country will enroll a million youths 18 years of age and younger

"Many of them," he added, "will come from non-farm homes, and farm work may be a totally new experience. Their one big lack may be in safety education for the particular circumstances they soon will encounter.

"Livestock need not be dangerous if properly handled, power equipment is safe when correctly operated, and labels on farm chemicals carry their own warning

"Farm machines are equipped with safety devices, but it's up to the operators—beginners and experienced alike—to keep guards in place and to shut off power before making adjustments

"All of these factors require know-how and demand maturity of judgment These develop slowly, and even after they have been acquired caution on safety hazards still is in order

"Young people have the pioneering spirit. With their help, and with the backing of all segments of rural life, Pennsylvania can become the safe farming state."

Farm Women 10 Present Skit

Four members presented a skit on "How to buy in foreign countries" at a recent meeting of Farm Women Society 10 at the home of Mrs John Esbenshade, 1740 New Holland Pike.

Participating in the skit were Miss Frances Lefever, Mrs. Harry Sloat, Mrs. William Fox, and Mrs John Habecker.

Special guest at the meeting was a young Brazilian, Augusta Delima, who spoke to the ladies on his impressions of the United States. From the city of Brazilia, Augusta is presently an exchange student at Harrisburg High School.

Augusta also provided special music for the meeting along with Margaret and Allen Tate, grandchildren of Mrs. Esbenshade.

The group voted a donation of $75 to the Osteopathic Hospital drive, $10 to the American Bible Society, $10 to Mental Health, and $5 to CARE.

A bus trip is planned by the organization to take a tour through Washington, D C on Wednesday, June 10 Reservations should be made by contacting Mrs Frank C Hodecker, 907 Rohrerstown Rd

Members of Society 19 will entertain members of Society 10 at the Landisville Church of God at 1 30 p m today

Next regular meeting of Society 10 will be held on Saturday, May 2 in the home of Mrs M S Delp, 145 Delp Rd, Lancaster

How to control weeds and grasses in soybeans and corn this season without risk to soybeans, corn or grain next year

Applied pre-emergence in corn at planting time, "Lorox" gives effective residual control of germinating annual weeds and grasses including tough giant foxtail.

In soybeans, pre-emergence weed control with "Lorox" keeps rows free of annual weeds and grasses that steal water, nutrients and sunlight...and profits.

A directed post-emergence treatment in corn with "Lorox" provides contact kill of growing weeds and grasses, as well as control of germinating weed seedlings

Soybean and Corn Growers: Control those weeds and grasses this season with new DuPont "Lorox". It offers you these unique advantages:

- **One chemical**...used just once in a season, does the job in both soybeans and corn.
- **Controls both annual weeds and grasses**...including that tough one, giant foxtail.
- **"Lorox" kills 2 ways**...its killing action is residual as well as by contact.
- **Versatile**..."Lorox" may be applied at planting time as a pre-emergence treatment in soybeans and corn. "Lorox" plus Du Pont Surfactant WK may be used in corn as a directed post-emergence treatment when weed problems develop (only when pre-emergence treatment is not made).
- **No soil residue problems**. .you can use "Lorox" this season in soybeans and corn without risk to soybeans, corn or grain next year.

Find out more about the unique advantages of DuPont's new weed and grass killer for soybeans and corn. See your dealer...or write DuPont, Room N-2539, Wilmington, Delaware 19898.

On all chemicals, follow labeling instructions and warnings carefully

● 4-H Leaders

(Continued from Page 1)

presented to four 4 H members. They were Judith Waifel, Conestoga R2; Mary Ellen Mumma, Manheim R1, Elvin Hess, Leola R1, and Sharynanne Schreiber, New Holland. Miss Pat Zartman, Ephrata R3, won a $50 scholarship.

County medals from the National 4-H Foundation were presented as follows: Achievement, Donald Trimble and Elaine Stoltzfus, agriculture, David Denlinger, beef, Wesley Mast; dairy, Elaine Stoltzfus, field crops, Annette Long; garden, David Denlinger, leadership, Donald Trimble, and swine, Eugene Hosler.

REPORTERS HONORED

Two 4 H club news reporters were presented desk sets in recognition of outstanding work. Robert Campbell, on behalf of Lancaster Farming, presented the award to Eric Stoner, 1051 Eden Road, reporter for the county Wildlife club. Richard Leaman, on behalf of the county council and an anonymous donor, made the presentation to Vikı Jo Shank, Elizabethtown, reporter for the Needles and Thread club.

Patron awards were presented to A Landis Brackbill, principal of the Penn Manor High School, and Mrs Landis Myer, president of the County Farm Women's Society.

Twenty seven other awards as follows were presented to leaders for five and ten years of service

(Continued from Page 1)

which went on to the reserve championship in the live Yorkshire show In medium Yorkshires, two other Willow Glen entries placed third and fourth

Judge Glenn Keene, Penn State University livestock specialist, put the grand championship ribbon on a Hampshire exhibited by John Strawbridge, Stewartstown, York County The grand champion trio was shown by Reno Thomas, Beavertown, Snyder County.

Garden Spot 4-H Reorganizes

Harvey Heller, 751 Willow Road, was elected president of the Garden Spot Community 4-H club Thursday night at the Smoketown Elementary School.

Other officers elected for 1964 were Bob Landis, vice president; Ruth Mellinger, secretary; Nancy Stoltzfus, treasurer; Bill Houser, song leader, Ken Hess, news reporter, James Houser and Linda Hoober, game leaders; and Jim Houser, county council representative

No one can tell you exactly how to use spices, remands Marguerite Krackhardt, Penn State extension nutrition specialist You must experiment, remembering that spices either enhance the natural flavor of foods or add an interesting new flavor to a rather bland food

Checkerboard News

10 years of research behind Purina Early Weaning Chow

Purina Early Weaning Chow for baby pigs is extra palatable, highly-fortified, nutritious. It's made for hogmen who plan to wean pigs at 3 weeks . . . or even earlier. It's used in early weaning of late-farrowed litters, for orphan pigs or undersize pigs at normal weaning age.

In 6 tests on 616 pigs, Early Weaning Chow-fed pigs gained as fast as pigs on sow's milk and creep feed from the 3rd to 6th week—.77 lb. per pig daily —made 1 lb. gain from only 1.27 lbs. feed!

In on-the-farm tests, pigs followed the same pattern, weighed 23-33 lbs. at 6 weeks. Cost per lb. of gain on good pigs raised under good management ranged from 12¢ to 14¢.

LOW COST PRODUCTION... the reason why more farmers feed PURINA®

DO YOUR COWS OWE YOU MONEY?

If your cows aren't producing up to their full capacity, they do. Here's how to get what they owe you: Put 'em on Pioneer, **the feeds with balanced amino acids for better protein building.** Amino acids are the basic building blocks of proteins. When they're balanced, you get top production, top profits The people at Pioneer know this because they've put more than 90 years into scientific research and development. That's why Pioneer will help you challenge your cows to produce up to their bred-in ability. It builds big, healthy calves that develop into high-producing, high-profit milkers. And when dry cows freshen, Pioneer gives them the nutrients they need for producing more milk than before. So let us help you collect more money from your cows. Stop in or phone soon.

BUSY DAY DINNERS

By Mrs. Richard C. Spence

SPENCE

Comes spring, and tasks that have been in seeming hibernation all through the winter suddenly demand attention. That's when it's nice to have some quick dinner ideas on hand so that satisfying meals can be prepared without taking too much time from a busy day. Take advantage of the many prepared foods and mixes now available on your grocer's shelf. Don't be too surprised if you find that using mixes and ready-to-eat items is sometimes cheaper than starting a recipe from scratch. And if you follow the directions for preparation carefully, you can usually count on a successful "dish".

One quick evening meal can be built around speedy Souper Crisp Chicken. To prepare this main dish, just dip chicken pieces in slightly diluted cream of mushroom soup, then in corn flake crumbs. The crumbs give the baked chicken a delightfully crisp coating Heat additional soup to accompany the chicken as a sauce.

SOUPER CRISP CHICKEN

1 broiler-fryer chicken, cut in serving pieces
1½ cups corn flake crumbs
1 teaspoon salt
¼ teaspoon pepper
1¼ cups (10½ ounce can) condensed cream of mushroom soup
¼ cup warm water

Wash chicken pieces and dry thoroughly. Combine corn flake crumbs with salt and pepper. Blend ½ cup of the soup with water. Dip chicken pieces in soup-water mixture, then roll in seasoned crumbs. Place chicken pieces, skin side up, in foil-lined shallow baking pan; do not crowd. Bake in moderate oven (350 degrees) about 1 hour, or until tender. No need to turn chicken while cooking. For less crisp crust, cover lightly with foil during first 45 minutes of baking. Prepare remaining soup according to sauce directions on can and serve with chicken.

Corn-crisped Salmon Croquettes are almost as easy as chicken. And because they are baked rather than fried and require no watching, you are free for other tasks Tuna can be substituted for the salmon.

CORN-CRISPED SALMON CROQUETTES

1½ cup corn flake crumbs
1 teaspoon monosodium glutamate
2 cups (1 pound can) salmon, drained and flaked
1 cup evaporated milk
¼ cup pickle relish, drained
¼ cup finely chopped celery
2 tablespoons finely chopped onions

Combnie 1 cup of the corn flake crumbs with monosodium glutamate. Mix together remaining corn flake crumbs, salmon, ½ cup of the milk, relish, celery and onions. Shape mixture into 12 balls or cones. Dip salmon croquettes in remaining milk, then roll in seasoned crumbs. Place croquettes in aluminum foil-lined shallow baking pan; do not crowd. Bake in moderate oven (350 degrees) about 35 minutes. Serve with a creamed vegetable sauce, if desired. 4 to 6 servings.

* * *

Spaghetti dishes are always good "busy-day" dinners

HAM SPAGHETTI SKILLET

2 cups diced, cooked ham
2 tablespoons fat
¼ cup chopped green pepper
½ cup chopped onion
1 clove garlic, minced
1 pound, 3-ounce can (2½ cups) cooked tomatoes
8 ounces spaghetti
1 cup shredded sharp cheddar cheese
1 teaspoon salt

Melt fat in large, heavy skillet. Pan-fry onion and green pepper until tender. Add ham and brown lightly. Add garlic and tomatoes Cover and cook over low heat 30 minutes. Cook spaghetti according to directions on package. Combine spaghetti, cheese, and salt with ham mixture in skillet. Continue cooking, uncovered, about 10 minutes. 8 servings.

SPAGHETTI SOUFFLE

1⅓ cups spaghetti, uncooked, broken in pieces
1 tablespoon melted butter
1 tablespoon flour
1 cup milk
2 cups grated sharp cheese
3 egg yolks, beaten
⅔ cup dry bread crumbs
¼ cup chopped onion
1 tablespoon chopped parsley
1 tablespoon chopped pimiento
1 teaspoon Worcestershire sauce
½ teaspoon salt
3 egg whites, stiffly beaten

Cook spaghetti in boiling salted water until tender; drain. Combine butter, flour; add milk; cook over low heat until slightly thickened, stirring constantly Add cheese; stir until melted. Gradually stir hot mixture into egg yolks; add spaghetti, bread crumbs, onions, parsley, pimiento, Worcestershire sauce, salt; mix thoroughly. Fold egg whites into spaghetti mixture. Pour spaghetti mixture into greased 1½ quart casserole. Bake 30 minutes at 325 degrees. Garnish with grated cheese, chopped parsley, pimiento strips. 4-5 servings

Before wintertime runs out, treat your family to a supper of steaming corn chowder It's hearty enough to satisfy even the hungriest teen-ager, it's also an economical dish right now. It's good with a tomato and cucumber salad and hot mince pie for dessert.

CORN CHOWDER

1 cup diced potatoes
1 cup boiling water
3 slices bacon, cut in small pieces
1 medium onion, chopped
1½ cups canned whole kernel corn
1 cup milk
Salt and pepper to taste
2 tablespoons chopped parsley

Cook potatoes in water in covered pan 10 to 15 minutes. Meanwhile, fry the bacon until some of the fat has cooked out Add the onion and cook until onion is soft and bacon is lightly browned. Add bacon, onion, fat and corn to potatoes Cook slowly until potatoes are done—about 10 minutes Add milk, salt and pepper Heat just to boiling. Sprinkle with parsley. Serves 4.

SIMPLE

ONE-LEVER DRAFT CONTROL

Draft-o-matic

You'll like the draft control on the Case 430 and 530 tractors.

A *single* lever lets you raise and lower implements . . . set draft *and* depth . . . make momentary adjustments in the draft as desired.

The draft control is easy to get at. All Case Draft-o-matic components are *outside* the tractor for fast and easy servicing — you don't have to open up the tractor. And Case Draft-o-matic, with fewer moving parts, and less "travel" as they work, means less adjustment, less wear, less maintenance cost.

See this smoother, more responsive draft control. It's just one outstanding feature of the world's diesel fuel economy champions of their class — the 3-plow Case 430 and the 3-4 plow Case 530. Then see proof of performance on your farm. We're ready to demonstrate.

Case Power and Equipment
Elizabethtown, Pa.

(Continued from Page 8)

SAUCEPAN SUPPER WITH FRANKS

½ pound franks
7 ounce package noodles
2 teaspoons salt
1 cup dairy sour cream
1½ teaspoons Worcestershire sauce
⅛ teaspoon nutmeg

Place franks and noodles in boiling salted water in the same saucepan. Continue to cook for 8 minutes. Remove franks from water Drain water from noodles and place in serving dish Toss with sour cream, Worcestershire sauce and nutmeg. Place franks on top of noodle mixture. Serve immediately. 4 servings.

TUNA CHEESE SOUPREME

1¼ cups (10½ ounce can) condensed cheese soup
½ cup milk
2 cups cooked rice
1 cup (7-ounce can) tuna, drained and flaked
¼ cup chopped parsley
½ cup corn flake crumbs
1 tablespoon butter or margarine, melted

Combine cheese soup and milk In greased 1½ quart casserole, arrange layers of rice, tuna, parsley and cheese soup mixture; repeat layering. Combine crumbs with melted butter. Sprinkle over tuna mixture. Bake in hot oven (425 degrees) about 15 minutes or until thoroughly heated Serve at once. 6 servings.

* * *

"Busy-day" dinners need desserts, too; desserts that are easily prepared. Like this easy Cherry-Nut Pudding

EASY CHERRY NUT PUDDING

½ cup corn flake crumbs
1 package (9-ounce) loaf size white cake mix

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

Storage Principles Worth Remembering

THURSTON

Store equipment and supplies where you use them first, whether you put them on shelves, in drawers, or hang them up

Store items within your own easy reach

Keep the heavy items you use most often at a comfortable lifting height This means no higher than your shoulders and no lower than seven inches below your elbow when you stand comfortably erect

Stack only identical items, such as dinner plates or saucers

Store utensils only one row deep on shelves so they are easy to see and reach.

Food For Thinking

A good breakfast may well be food for thought. Starting the day with a good breakfast provides the nutrients everyone needs for mental alertness and efficiency. So, whether you think at home, at school, or at work, begin the day right with a nourishing breakfast You'll think better and feel better, too.

Lifting Properly Makes Work Less Tiring

When you lift objects, stoop by bending your knees instead of bending over with your back This uses the big muscles in your legs and thighs and protects the small weak muscles in the small of your back.

When carrying groceries, divide the load into two small-

(Continued on Page 10)

Reasonable in Cost

that's what the folks who live in these homes say about *flameless* ELECTRIC HOME HEATING

PP&L
AN INVESTOR-OWNED ELECTRIC UTILITY IN THE SERVICE OF THE PUBLIC

Here are just four of the more than 4,000 PP&L customer families who have already installed flameless electric heat. They say it's clean! carefree! comfort-plus! and reasonable in cost!

- Electric heat eliminates the need for chimneys and bulky fuel storage equipment.
- Does away with periodic cleaning, burner adjustment or repairs . . . in fact, the need for any service is rare.
- Costs ¼ less than just two years ago, thanks to PP&L's low heating rate.

Check with your Reddy Kilowatt Recommended Electric Home Heating Dealer today. See how little it will cost to heat your home with flameless electricity.

New rates lowering the cost of total electric living even further were filed with the Pennsylvania Public Utility Commission February 28, 1964.

● For The Farm Wife

(Continued from Page 9)

1 can (1 pound 6 ounces) cherry pie filling
½ cup finely chopped nutmeats
¼ cup butter or margarine, melted

Combine crumbs thoroughly with cake mix Spread pie filling in greased 8 x 8-inch baking pan. Sprinkle cake mix-crumbs mixture evenly over top fo filling. Top with nutmeats Drizzle butter over all. Bake in moderate oven (350 degrees) about 1 hour or until very brown Serve warm or cold with ice cream or whipped cream.

This custard pudding, made with whole bran cereal with wheat germ has all the spicy goodness of an oldtime bread pudding.

BRAN BUDS CUSTARD PUDDING

3 eggs
2 cups milk
½ cup sugar
⅛ teaspoon nutmeg
⅛ teaspoon salt
1 teaspoon vanilla flavoring
½ cup raisins
1 cup whole bran cereal with wheat germ (Bran Buds)

Beat eggs slightly; add remaining ingredients and mix well Pour into 1-quart baking dish, place in pan of hot water Bake in moderate over (375 degrees) about 55 minutes or until knife inserted near center comes out clean. Stir custard several times during first half hour of baking Serve warm. 6 servings.

SURPRISE BREAKFAST CAKE

½ cup light brown sugar
2 tablespoons butter or margarine
½ teaspoon cinnamon
10 Fig Newton cakes, crumbled
1½ cups sifted flour
2½ teaspoons baking powder
½ teaspoon salt
2 eggs
¾ cup sugar
⅓ cup butter or margarine, melted
1 teaspoon vanilla extract
½ cup milk

Mix together light brown sugar, butter or margarine, cinnamon and crumbled fig newtons Set aside Sift flour, baking powder and salt together. Beat eggs until frothy, then beat in sugar and melted butter until well combined Add vanilla and milk Beat in flour mixture until well combined Pour half of mixture into 8-inch square pan which has been greased and lightly floured Sprinkle half of fig newton topping over cake batter Spread rest of cake batter over and top with remaining topping Bake 35 to 40 minutes in a moderate oven (350 degrees) Makes 6 to 8 servings

Temporary Storage

When you need temporary storage, don't put a lot of money in it, advises Helen E Bell, Penn State extension home management specialist An inexpensive fiberboard chest may add storage space and design interest to a room A low-cost metal cabinet used for storing baking supplies can be moved later into the basement or utility room for flower arrangement supplies

● Have You Heard?

(Continued from Page 9)

er bags. They're easier to manage than one large bag.

Hold any object you lift or carry as close to your body as possible. This helps to keep body balance. And you'll notice the difference in the pull on arm muscles as you carry a weight, such as a heavy book, at arms length.

Think of ways to avoid heavy lifting, such as putting the clothesbasket on a stool or chair, then putting wet clothes in it. This does away with a bad lifting job because wet clothes can weigh twice as much as dry ones

About Variety Meats

Variety meats, such as liver, tongue, and kidneys, give your meals new interest and flavor And you may save money on your meat bill with variety meats.

Nutritionally, variety meats are important for the vitamins and minerals they contain. Liver is a rich source of iron, the B vitamins, and vitamin A.

Variety meats lend themselves to tasty dishes including liver and onions, fresh beef tongue with horseradish sauce, braised veal hearts, kidney stew on rice, and others Refer to your cookbooks for specific recipes using each of the variety meats

To Remove Scuff Marks From A Waxed Floor

Use a cleaning-polishing wax. It will take off the marks as it removes the wax. Where you've used a self-polishing wax, try a solution of a mild soap and lukewarm water Or use plain steel wool, not the pads treated for cleaning and polishing kitchen utensils.

Try A Classified

"It does pay to use limestone"

Good crops deplete good nutrients from the soil. Replace your limestone regularly to assure large crops.

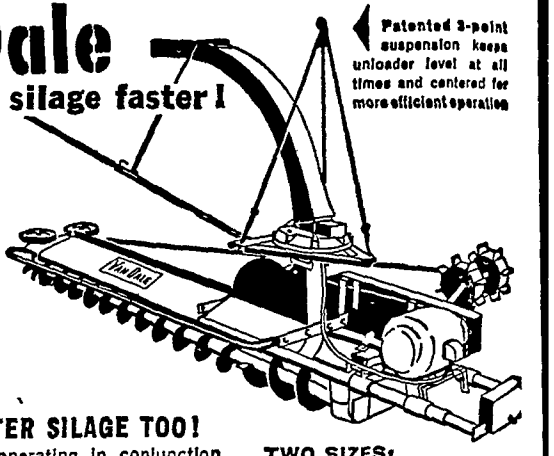
Get the BIG silo unloader value!

VanDale
Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as so often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 10' to 16'
Heavy Duty—for silos 12' to 30'

arm Women 6 ike Chocolate

Chocolate was the most popu- r cake mentioned during roll ll of members at a recent eeting of Farm Women Socie- 6 in the home of Mrs. E. usser Heisey, Mount Joy R2

Mrs. Mark Geyer, president chaired the meeting; Mrs. Pauline Keener was in charge of devotions, and Mrs. Harry Saylor was in charge of the music.

Miss Jean Geyer, a teacher at the East Earl Township Elementary school, showed slides and described her work as Christian Education Director for the Brethren Service center in the Chicago slum area.

Thirty members and six guests were present Next meeting will be held Saturday, May 2, at the E U B. Church, Elizabethtown, when Mr. and Mrs. Elmer H. Horst and daughters from Hershey R1 will entertain the group with a musical program.

World War I veterans have some six thousand term and 266 thousand converted GI life insurance policies in force with a total face value of more than $1 billion, the Veterans Administration reports

CLYDE WISSLER, NEW HOLLAND R1, center, shows his parents, Mr. and Mrs. Eugene Wissler, the plaque and $100 check he received Tuesday as national winner in the A O. Smith feedlot planning contest for Future Farmers of America. Clyde explained how he designed his home feedlot to feed out 250 head of 900 to 1,000 pound steers on haylage and grain. His plan called for adding 120 feet of feed auger and a gas tight silo The award was presented by A D Hyde, company president, at a luncheon in the Host Motel attended by approximately 250 persons. L F Photo.

Eat Better for Less

Milk is your most economical buy for calcium, the nutrient most often short in diets, according to family economists of the U S Department of Agriculture Milk is also your least expensive source of riboflavin, one of the B vitamins Whole grain and enriched flour, cereals, and baked foods, and dry beans and peas are inexpensive sources of seven of the nine key nutrients Potatoes are a good buy in thiamine and niacin, two of the B vitamins, and vitamin C However, citrus fruits are the best buys for vitamin C; economical sources of vitamin A are dark-green and deep yellow vegetables

Farm Women 1 Host Society 16

The ladies of Farm Women's Society No 1 entertained the ladies of Society No 16 at a luncheon on Saturday at Salem Lutheran Church, Lincoln Mrs Abram Bollinger the president, was in charge of the meeting which followed, and Mrs Willis Bucher led the devotions

A rummage sale will be held on Friday, May 8, in Odd Fellows Hall, North Broad Street, Lititz, the Ways and Means committee, Mrs Amos Shenk, chairman

A Workshop Cookout will be held today at the Christian Musser farm at Mount Wolf The Mother-Daughter Banquet will be held on Friday, May 1, at 6 15 p m at the Brunnerville Fire Hall Mrs. Kenneth G Smithson will be the speaker and show her Biblical dolls Heart Haven bazaar was announced for April 21.

Mrs W Dean Fyock showed slides and told about her recent trip to Europe and displayed her many souvenirs from the various countries she visited which included Holland, England, Austria, Switzerland, Denmark and Norway.

Virginia Brubaker and Wendi Fritz presented two vocal solos The committee in charge included Mrs Leon Ulrich, Mrs. Roy Brubaker, Mrs. Raymond Groff, Miss Rachael Bollinger, and Mrs Howard Wolf.

Eggs in Daily Menus

Eggs are a top-class protein food, in the class with such foods as meat and milk for building and repairing body tissues, points out Louise Hamilton, Penn State extension specialist Also, eggs are out-standing for two of the B vitamins, thiamine and riboflavin, and for vitamins A and D In addition, the egg yolk is rich in iron and also has phosphorus and other minerals the body needs

Beef for Grinding

When buying beef for grinding, you may prefer a combination of various less expensive cuts, point out Penn State extension nutrition specialists While rich in flavor, ground meat containing a fairly high proportion of fat, will shrink considerably during cooking, and the cooked patty will be smaller than one made from leaner meat

Milk your cows for all they're worth
(most producers don't)

Get all the milk you can out of your cows. Chances are they could be giving more milk than you're getting now. So feed 'em Pioneer. It helps your cows produce up to their full bred-in capacity. Because Pioneer makes **the feeds with balanced amino acids for better protein building.** Amino acids are the basic building blocks for all proteins. Balance them and you get top production and top profits. How do the Pioneer people know this? They've been in the feed business for more than 90 years. Their scientific research has developed feeds formulated to the genetic capacity of herds in this area. Pioneer builds big healthy calves that develop into high-production, high-profit milkers. And when dry cows freshen Pioneer gives them all the nutrients they need for producing more milk than before. Let us show you how you can milk your cows for all they're worth. Come in or call soon.

PIONEER®

Joseph M. Good & Son
Leola, Pa.

the feeds with balanced amino acids for better protein building

Lee Bull

(Continued from Page 1)

oad freight rates, a "breakhrough" that would give Pennsylvania a better chance to ompete with the southern tates on livestock feed prices.

Insecticide Tests

Bull said improved detection devices is making it harder all the time for farmers to meet pesticide tolerances. "Zero tolerance five years ago is not the same as zero today," he said, and called for a revamping of regulations to set a limit on the amount of pesticides allowable in food products. "If the same amount of the chemical is in foods today as five years ago, shouldn't it be called zero, or insignificant, or so forth?"

He said by 1970, or 1975 at the latest, we can probably eliminate brucellosis from all species of livestock in the U.S, but tuberculosis is a different problem. It is very difficult to get the last few cases, he said.

Land Use Questioned

The secretary called for the formation of a watchdog committee for cases involving land taken under imminent domain.

He said, "If we are going to stay in the business of farming and keep the important food industry in Pennsylvania, we are going to have to do something about the large amount of class I land going into roadways, building sites and etc.

One of the best ways to accomplish these things, he said, is to work for more farm-oriented legislators. He said he looks for legislation soon regarding more stringent laws on open space and tax relief for farmers in industrial and other built up areas.

Bull was introduced by Lancaster County Agent, Max Smith.

Dairy Show

(Continued from Page 1)

and with the approval by Governor William W Scranton.

Governor Scranton signed the measure on Thursday, in a special ceremony.

The addition of the dairy event brings to three the number of state sponsored agricultural expositions.

The January state farm show was inaugurated 48 years ago and is open only to Pennsylvania exhibitors

Former Secretary of Agriculture Dr. William L Henning founded the Pennsylvania Livestock Exposition, a November beef cattle, hog and sheep show, in 1957. It is also open to American and Canadian breeders

Bull had been a leading advocate of the dairy show to focus attention on Pennsylvania's leading farm commodity.

Cotton-Wheat Bill Goes To The President

WASHINGTON — The House of Representatives this week passed the administration-backed cotton wheat subsidy bill and sent it directly to President Johnson

The bill was half of a two pronged program sponsored by the administration and was passed in a late night vote after the food stamp plan bill had received approval earlier in the day.

The food stamp bill went back to the Senate It is considered a key part of the President's declared "war on poverty" The farm bill is designed to prevent any drastic fall in wheat farm income in this presidential election year

The cotton-wheat bill came to the floor of the House under a parliamentary procedure that limited debate to just one hour and prevented any amendments The House accepted the Senate version of the bill without change in order to speed it to the president for his signature

The cotton section of the farm bill provides a subsidy to American cotton textile mills so they can buy U S cotton at the world price available to their foreign competitors

Rep John V Lindsay, R-N Y, called it an "antiicity, anticonsumer bill" that would raise the price of every wheat product It would raise the cost of spaghetti. It would raise the cost of crackers. It will increase the burden of those least able to pay for it," he said.

Rep. Wayne Hays, D-Ohio, replied that the "price of wheat has little or no relation to the price of bread"

One Republican, Rep Mark Andrews, R-N D, spoke for the bill, and said, "I can't go back to my farmers and justify voting against this"

He said no alternative wheat bill has a chance of passage in this Congress

The session was marked by Republican delaying tactics and a matching stubbornness on the part of Democratic leaders

Just before the final passage, the House defeated a last ditch GOP maneuver to require states to match federal funds 50 50 on the cost of the food stamps, which are aimed at putting more variety on the dinner table for the nation's poorest families That vote was 223-195

Pennywise and Pound Foolish

Meat cuts with the lowest price tag aren't necessarily the best buy, cautions Harold Neigh, Penn State extension consumer economics specialist Some cuts have more bone, gristle, and fat than others That means fewer servings per pound One pound of shortribs, spareribs, breast of veal, or brisket will provide only one or two servings while one pound of boneless or ground meat will yield four or five servings

Producers Co-op Shows Increases

Coatesville, Pa. — Directors of Producers Co-operative Exchange this week heard reports of increases in units sales and dollar volume.

President William G. Carlin reported cartoned egg sales were up 26 8% for first 6 months of fiscal year. Net income and net expenses of the egg division were both lower than last year. However, this was offset by increased earning in special products and other miscellaneous income.

It was further reported the Exchange is now operating two egg grading machines on a two-shift basis Two new and improved features are being added to the present plant washer. This will make it possible to do a better washing job at the plant, thereby eliminating a time consuming job for the egg producer at his farm.

The trend today shows egg producers are increasing their flock size, new people are getting into egg production and small producers are discontinuing. While dozens sold increased 26 8% in six months this was accomplished with 16 5% less producers.

Good farm management is very important for success in today's agriculture; this ability often separates the men from the boys in agricultural production. To become acquainted with what is to be done, and then getting it done on time, is a step in the right direction.

● Guernsey Men

(Continued from Page 1)

Bolton Center near Kennett Square. This is part of the University of Pennsylvania school of Veterinary Science where animals are taken for treatment that can not be administered by local veterinarians.

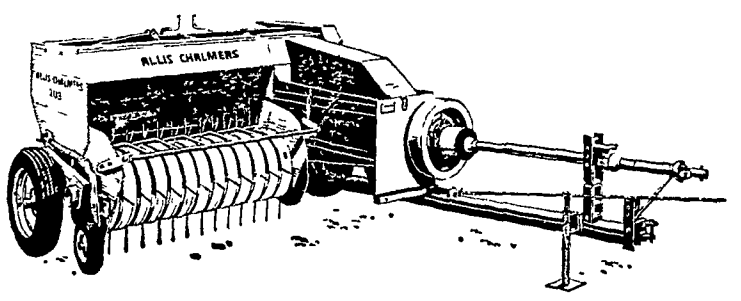
At the second stop, Wawa Farms, Donald Brown will show guernsey breeders the former Applebrook herd.

At Liseter Farms the group will see famous Liseter Guernseys, a herd of ponies and a kennel of beagle dogs

The committee hopes to be able to take the group aboard an airliner at the International Airport at Philadelphia

All persons on the tour are asked to take a basket lunch.

TWIN RAKE FEEDING WITH "ELBOW FORK" ACTION



MAKES THE BEST BALES YET
303 BALE-CHIEF

TWIN RAKES on the Allis Chalmers 303 Bale-Chief make bales solid, square — tied tight The kind an ejector can throw. Bales resist buckling because "Elbow Fork" action takes out windrow wads that can make other bales pop their twine Takes heavy windrows into the chamber in clean, sweeping action Forks retract completely up and out of hay each back stroke No drag or auger-churning to shred leaves Big capacity Come see this 303 Bale-Chief now.
